

Store your archive data quickly and leanly. At the same time you can reduce your costs massively.

Having us as a partner on your side you do not need to worry anymore about an own archive system with accordingly connected storage system. As experienced Microsoft Gold Partner, we offer an archive system “out of the box” in Microsoft Azure Cloud. To do so, we use the product Content Link (PCL) of our long-standing partner PBS Software GmbH and connect it with Azure Blob Storage – if desired in your own Azure Cloud or in ours.

Our approach/your solution

We provide you with a lean „out of the box“ entry into SAP Archiving on Azure. With our preconfigured systems and services, we bring your SAP archiving quickly and reliably into the cloud environment, and with the PBSContent-Link solution, you also have an economic and secure solution in Azure that is already established on the market. Established economic and secure archiving solution archiving solution, coupled with high availability and free scalability of the cloud approach.

We look forward to your inquiry and would be happy to present the project solution to you in detail.

ADVANTAGES AZURE CLOUD

- ▼ Audit-proof saving of data and documents over a long period of time
- ▼ No hosting of own archive server – no own storage required
- ▼ Secure connection of archive systems to your SAP® systems, on-premises as well as in the cloud
- ▼ Support of the servers by our experts, including tool-supported monitoring
- ▼ High cost efficiency

ADVANTAGES PCL

- ▼ Well-established archive system
- ▼ Support of all common SAP scenarios (data archiving, ArchiveLink documents, print lists, SAP DMS)
- ▼ Usage of SAP® ILM with SAP-certified WebDAV interface
- ▼ Flexible retention management
